

Week	Theme	Lecture	Date	Topic	Assignment	Working group
1	What is dynamic model?	1	Wednesday, 5 February 2025	Explanation of what Dynamic Modelling is	1. Formulating hypothesis + adapting models	How to work with a model
		2	Friday, 7 February 2025	Modelling physiological processes		
2	Modelling social processes	3	Wednesday, 12 February 2025	Modelling epidemics and self-organisation	2. Performing simulations + formalization	Formalizing relationships
		4	Friday, 14 February 2025	Emotion contagion + formalization		
3	Modelling behavior	5	Wednesday, 19 February 2025	What is behavior modelling?	3. Creating a Python-Leadsto model	Explaining Leadsto using the template
		6	Friday, 21 February 2025	Delayed response and motivation-based behavior		
4	Domain models	7	Wednesday, 26 February 2025	-- Q&A --		Help with implementation assignment 3
		8	Friday, 28 February 2025	Designing domain models		
5	Agent-based modelling	9	Wednesday, 5 March 2025	Introduction and ontologies	4. Designing and implementing a domain model	Help with designing a model
		10	Friday, 7 March 2025	Integrating domain models		
6	Analysis and support models	11	Wednesday, 12 March 2025	Analysis model	5. Developing an analysis model Final assignment - draft	Explaining an analysis model
		12	Friday, 14 March 2025	Support models + reasoning methods		
7	Wrap-up	13	Wednesday, 19 March 2025	Example: driving behavior	Final assignment - complete	Help with final assignment
		14	Friday, 21 March 2025	Summary
