

Literature

The book by Campbell-Kelly offers a great introduction to the US history of computing. The European side, as well as a history of AI, remains to be written, and is offered during the lectures. Most of the info is based on publications, some is still ongoing research. The literature I used in preparation of each lecture is listed below. If you want some further reading on the subject, this offers you a good start. Some of the older work, if I didn't find it online and connected it to the Canvas site, is here as well.

Lecture 1. Prehistory of computing

Jon Agar, *The government machine. A revolutionary history of the computer*, Cambridge (2003)

Susan Landau, *Listening in: cybersecurity in an insecure age*, New Haven / London: Yale University Press (2017)

Renee Barnes, *Uncovering online commenting culture: trolls, fanboys and lurkers*, London / New York: Palgrave MacMillan (2018)

Maarten Bullynck, Edgar Daylight and Liesbeth de Mol, Why did Computer Science make a hero out of Turing? in: *Communications of the ACM* 38 nr. 3 (March 1995), 37-39

Dillon Lidemann, Polemics, ambiguity, scales and digital discourse on 4chan, in: *Discourse, Context and Media* 24 (2018), 92-98

Felipe Massa, Guardians of the Internet: building and sustaining the anonymous online community, in: *Organization Studies* 38: 7 (2017), 959-988

Dermot Turing, *The Code Breakers of Bletchley Park*, London: Arcturus (2020)

Daniel Miller a.o., *How the world changed social media*, London: UCL (2016)

Nina Schick, *Deepfake and the infocalypse*, New York: Twelve (2020)

Susan Petrilli, Mother sense, language and logic: On Victoria Welby, inventor of signification, in: *Chinese Semiotic Studies* 13 (2017), 47-71

Susan Petrilli, *Signifying and understanding: reading the works of Victoria Welby and the Signification movement*, Berlin (2009)

Christine von Oertzen, Whose world? Internationalism, nationalism and the struggle over the 'language question' in the IFUW, 1919-1932, in: *Contemporary European History* 25 (2016), 275-290

Mark Mazower, *Governing the World: the history of an idea*, London (2012)

Roberto Garviá, *Esperanto and its rivals. The struggle for an international language*, Philadelphia (2015)

Jonnie Penn, Animo Nullius: on AI's origin story and a data colonial doctrine of discovery, in: *British Journal for the History of Science Themes* 8 (2023), 19-34

Lecture 2. Creating computers

Gerard Alberts en Bas van Vlijmen, *Computerpioniers*, Amsterdam (2017)

Gerard Alberts, De AERA. Gedroomde machines en de praktijk van het rekenwerk aan het Mathematisch Centrum te Amsterdam, in: *Studium* 1 (2008), 101-127

Gerard Alberts, Een halve eeuw computers in Nederland: een willekeurig getal, in: *Nieuwe Wiskrant* 22-1 (oktober 2002), 6-8

Slava Gerovitch, 'Mathematical Machines' of the Cold War: Soviet computing, American cybernetics and ideological disputes in the early 1950s, in: *Social Studies of Science* 31 (2001),

253-287

Petri Paju and Helena Durnová, Computing close to the Iron Curtain: Inter/national computing practices in Czechoslovakia and Finland, 1945-1970, in: *Comparative Technology Transfer and Society* 7 (2009), 303-322
