

# Introduction to AI Working Group Session 2

ANNETTE TEN TEIJE &  
MARK HOOGENDOORN

*VRIJE UNIVERSITEIT AMSTERDAM  
DEPARTMENT OF COMPUTER SCIENCE*

# TODAY

- Research problem presentations
  - > Assignment deadline this Friday
- Discussions on lectures
  - > Knowledge Representation (Frank)
  - > Machine Learning (Mark)
  - > Finding Literature (Ilaria)
- Working in groups

# THE ASSIGNMENT

## ■ Submit on Friday:

Write in 1 A4 what your choice is for the scope of your project (the "research problem") and what the problem is that you want to solve within that domain (the "task").

Examples:

- > Support for deafening by converting sound to image,
- > Elderly support when using email,
- > Detecting depressive people on Facebook

Tip: Think in your own environment, whether there are people who you could help with an Artificial Intelligence solution.

Take into account: domain, problem, input/output description (of the application), the knowledge that is needed.

# PRESENTATION SCHEDULE

- Group 42
- Group 43
- Group 44
- Group 45
- Group 46

# DISCUSSION LECTURES – KNOWLEDGE REPRESENTATION + MACHINE LEARNING

- Were the lectures clear?
- What were your take home messages?
- Was it new to you?

# DISCUSSION LECTURES - LITERATURE

- How do you find literature?
  - > E.g. Google Scholar, Citeseer
- Proper ways of citing, let's see how you do it
- Always cite (!):
  - > Summarize in your own words (just citation)
  - > Direct quote, use quotation marks
- Think about good keywords for your domain/task
  - > Your assignment always features talking to a domain experts

# NEXT ASSIGNMENT: LITERATURE

- Literature:

- > Formulate a question that you want to answer (your "research question"). The research question must be related to your research task (see previous assignment). Encode this question in a number of keywords (English, use synonyms, etc).
- > Motivate which literature search engines are best suited and how this lead to a list of the items you selected ("search and selection criteria").
- > Read, describe, summarise, give an analysis of your findings.

- Additional Knowledge Acquisition:

- > What experts have you spoken about, and why?
- > What knowledge did you want to collect, and did you succeed?
- > Does the knowledge match the state of the art? Is there a list of urgent problems?
- > Have you received feedback on your solution?
