

INTRO TO AI - MOCK EXAM 2024

1. What of the following techniques is commonly used to handle missing data when performing Data Wrangling?
 1. Filtering
 2. imputation
 3. Aggregation
 4. Normalisation
2. What is the problem of induction, and how does it relate to machine learning?
 1. It asks how we are able to reason correctly from past experiences. After we solved the problem of induction, we were able to build ML algorithms.
 2. It asks how we are able to reason correctly from past experiences. The question why ML works is an instance of this problem.
 3. It asks how we are able to reason logically from stated rules. After we solved the problem of induction, we were able to build ML algorithms.
 4. It asks how we are able to reason logically from stated rules. The question why ML works is an instance of this problem.
3. Which of the following terms is not related to Knowledge Representation?
 1. Ontology
 2. Description Logics
 3. Neural networks
 4. Semantics
4. A flowchart is a diagram that graphically describes (sub)steps of an algorithmic solution. True or false?
 1. True
 2. False
5. Which of the statements about rationality is true?
 1. Rationality requires complex perception of the world
 2. Rationality requires omniscience, i.e. the knowledge of all facts
 3. Rationality will always lead to optimal behaviour
 4. Rationality means choosing actions to optimise chance of achieving a goal
6. What is a systematic literature review?
 1. A quantitative review using statistical analyses
 2. A summary of existing systematic methods
 3. A rigorous method to identify, critically evaluate, and synthesise existing studies
 4. A method to organise existing bodies of work based on a coherent narrative
7. What can you not use the command line for?
 1. Manipulate files
 2. Create sequences of commands to execute
 3. Communicate with server
 4. Perform Graphical User Interface (GUI) tasks

8. What command can I use on the command line to move between folders?
1. cd /
 2. mv
 3. cd
 4. ls
9. Collaboration in Hybrid Intelligence can be promoted using Theory of Mind. True or False?
1. True
 2. False
10. Verification is the process of checking:
1. whether the software system meets the specified requirements of the users (testing the system's Correctness)
 2. whether the software system meets the actual requirements of the users (testing the system's Effectiveness)
 3. whether the software system is testable or not.
