

Introduction to Artificial Intelligence

11th & 12th of September 2024

TODAY'S AGENDA

01

SENTIMENT CHECK

How do you feel about the course so far?

02

DIVERSITY EXERCISE

You will work on this task with your teammates.

03

LITERATURE ASSIGNMENT

Recap on how to find relevant literature for your project

04

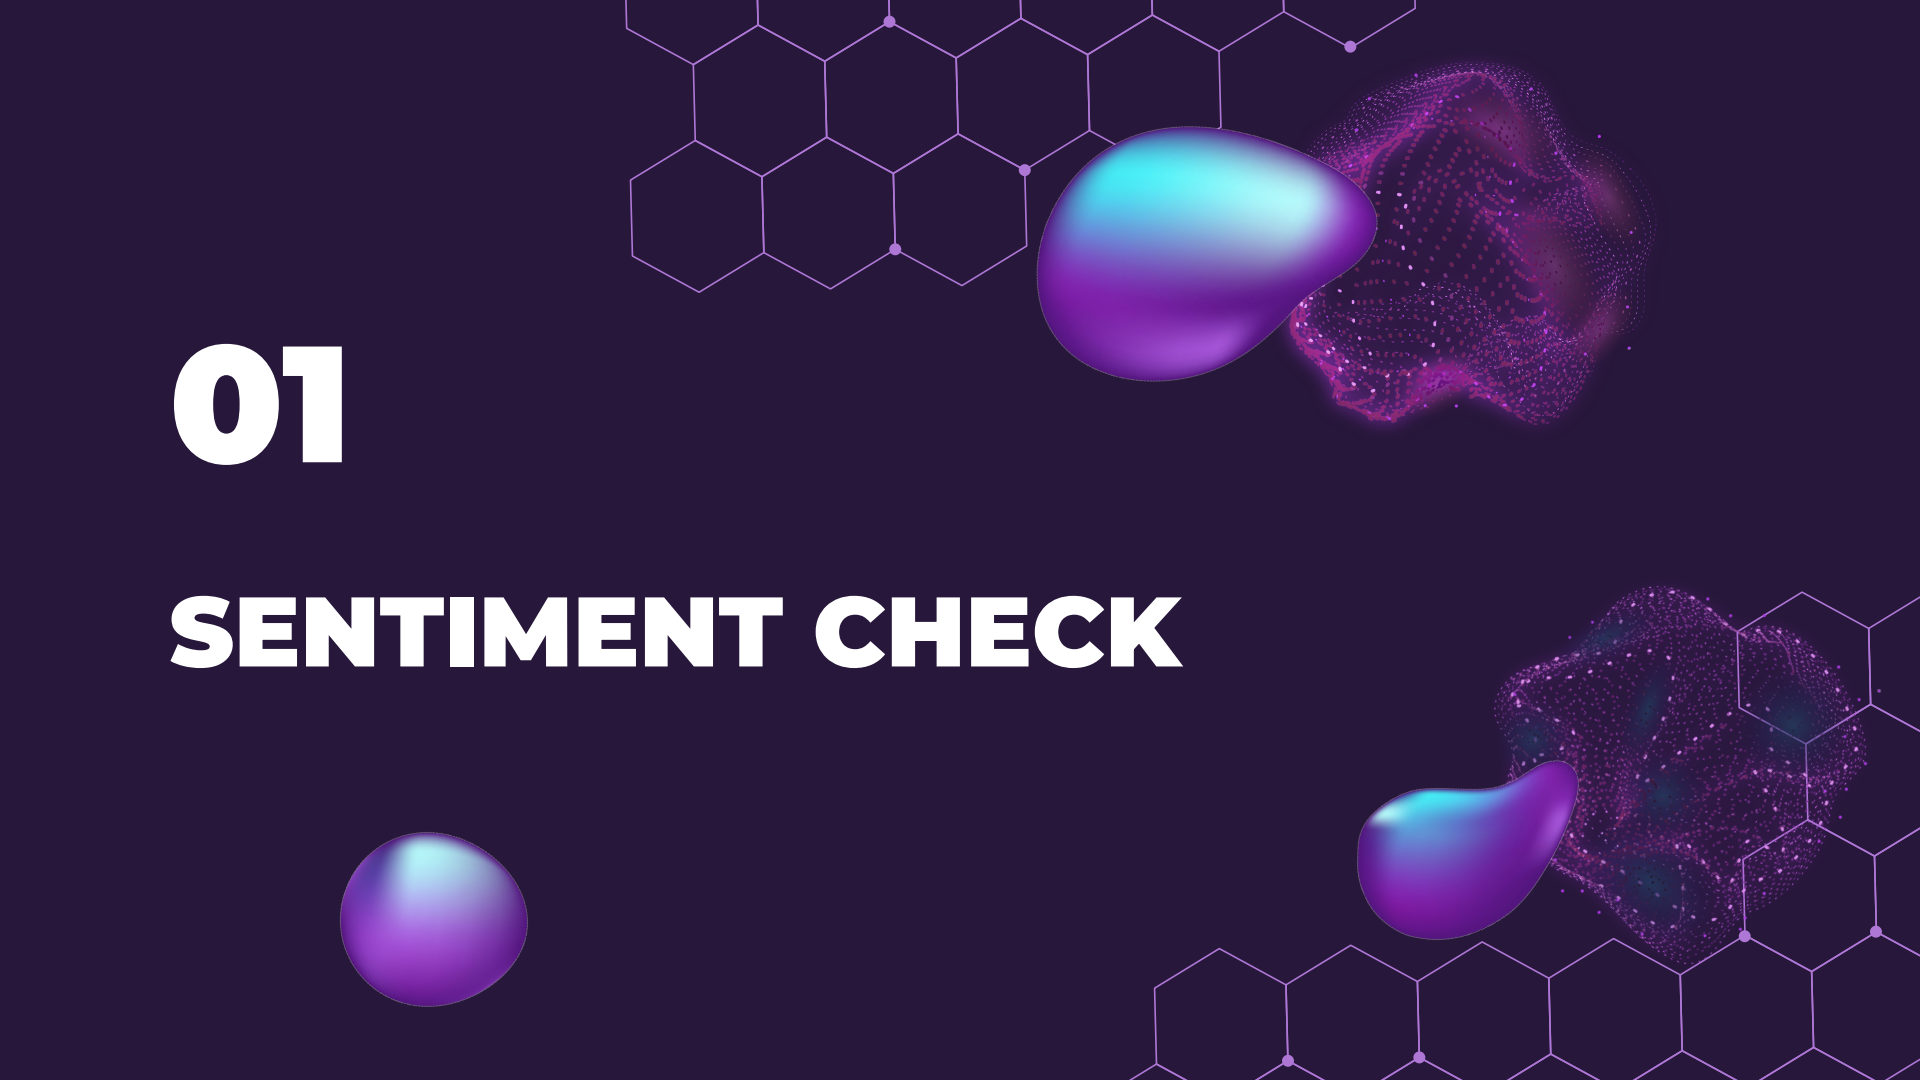

GROUP PRESENTATION

5 minutes presentation with slides on Research Problem

05

FOR NEXT TIME...

5-min presentation on your literature for feedback.

01

SENTIMENT CHECK

HOW DO YOU FEEL ABOUT THE COURSE SO FAR?

... AND WHY?

02

DIVERSITY EXERCISE

With your Teammates...

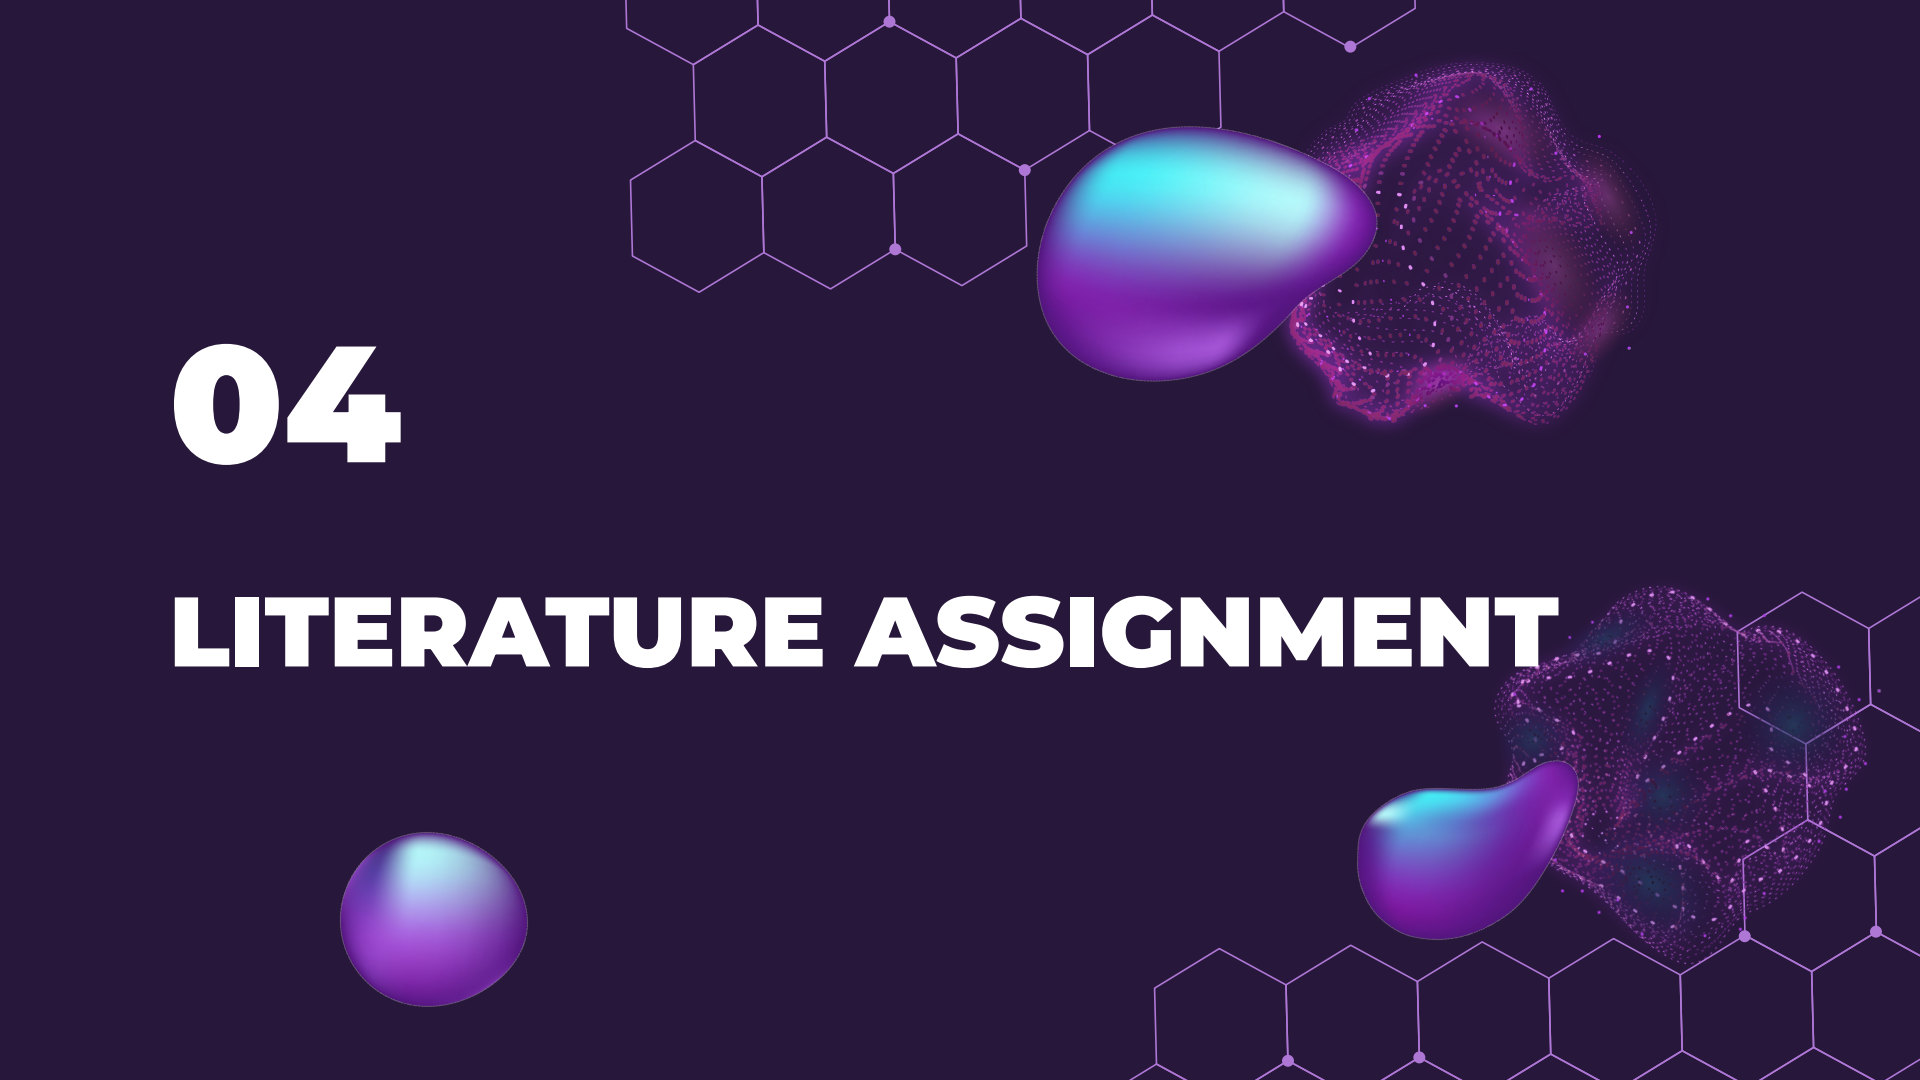

- ❖ Share at least 3 expectations (ex. I want cum laude, I expect this assignment to be difficult for me because I am not interested in this subject...)
- ❖ Create at least 5 ground rules for interaction that they will use for their group work.
- ❖ Submit on Canvas (Diversity Exercise Assignment)

03

GROUP PRESENTATIONS

04

LITERATURE ASSIGNMENT

Identifying Relevant Literature

- **Define your Research Question clearly**
- **Use Reliable Databases**
 - Google Scholar, PubMed, IEEE Xplore, ACM Digital Library
 - Do not use Chat GPT, it often makes up papers that do not exist (yes, even the latest versions)
- **Use specific and relevant keywords related to your Research Problem & Domain**
- **Evaluate Sources**
 - Publication Date, Impact Factor, Abstract

Literature (group assignment) Published Assign to Edit

Literature:

1. Formulate a question that you want to answer (your "research question"). The research question must be related to your research task (see previous assignment). Encode this question in a number of keywords (English, use synonyms, etc).
2. Motivate which literature search engines are best suited and how this lead to a list of the items you selected ("search and selection criteria").
3. Read, describe, summarise, give an analysis of your findings.

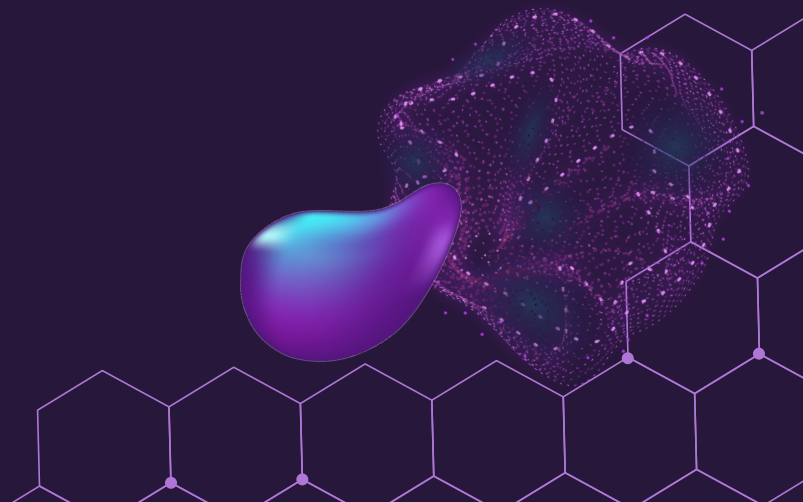

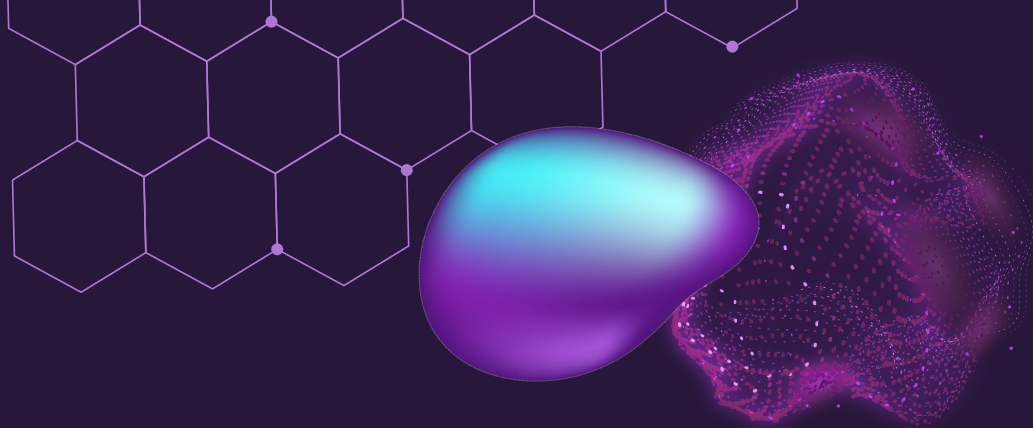

Additional Knowledge Acquisition:

- What experts have you spoken about, and why?
- What knowledge did you want to collect, and did you succeed?
- Does the knowledge match the state of the art? Is there a list of urgent problems?
- Have you received feedback on your solution?
- What knowledge of KA did you use?

NB This is a group assignment, only one of the group has to submit

05

FOR NEXT TIME...

A 5 minutes presentation WITH SLIDES

On the Literature Assignment.

No presentation, no feedback before the
assignment' submission :)
