

UPLOADING YOUR EXAM

FIRST, DOWNLOAD THE FINISHED NOTEBOOK

1. Click **File** in Jupyter Notebook
2. Choose **Download as** from the dropdown menu
3. Choose **Notebook (.ipynb)** from the second dropdown menu

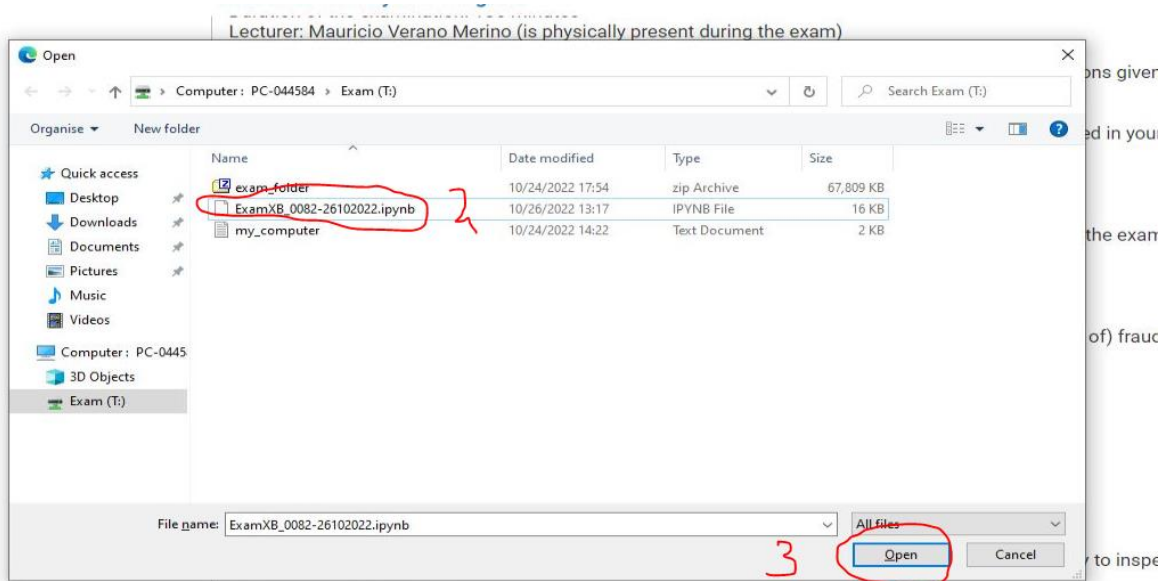

SECOND, UPLOAD THE NOTEBOOK YOU DOWNLOADED

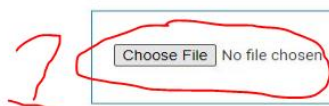

1. Start the exam in TestVision and click **Choose file** under the instructions
2. Navigate to the **T-drive** and choose the **LATEST(!!!!)** exam notebook
 - Watch the time of the last modification: make sure it's your latest version (if you don't see it, hit Refresh)
3. Click **Open**

IF THE FILE APPEARS IN TESTVISION, YOU ARE READY TO SUBMIT THE EXAM

(flip the page for screenshots on the TestVision step)

Practical TestVision instructions
Be careful with the ready button. Do not click on it before you have finished the exam.
Tips for students with dyslexia: You can enlarge the text of the exam by zooming in. Hold down the CTRL key and scroll up with your mouse wheel.
You can start the examination now, good luck!

OR

Introduction to Python Programming

Lecturer: Mauricio Verano Merino

Students are expected to come to the exam in the event that academic...
All mobile devices (telephones, tablets, etc.) are not allowed during the exam.
Exam instructions:
Only the following examination materials are allowed:
- Python cheat sheet and the practical TestVision instructions
- Blank scrap paper (2) and pen
Scrap paper should be handed in at the end of the exam.
Internet sources: only TestVision is allowed.
Computer programs: Jupyter Notebook
In case a student does not have a laptop, they can use the computer in the School and the General Guide to the University of Leuven.
The total number of questions is 30.
The cut-off score (the score you need to pass) is 15.
Indicate the weight of the questions:
- question 1: 20
- question 2: 25
- question 3: 10
- question 4: 15
- question 5: 30

As soon as we finish grading, we will define some hours when the students can come to the university to inspect their exam.
