TODAY

DEADLINE	Assignment	7-sep.	14-sep.	21-sep.	28-sep.	5-okt.	12-okt.	19-okt.
16-sep.	Research problem	working on	presentation					
23-sep.	Literature		working on	presentation				
30-sep.	Approach			working on	presentation			
14-okt.	Exp. evaluation				working on	presentation		
21-okt.	Poster					working on	present	
21-okt.	Video						working on	
28-okt.	Final report							working on

The assignment (Presentations)

- Literature & Knowledge Acquisition
- submit: Friday 23 September

Literature:

1. Formulate a question that you want to answer (your "research question"). The research question must be related to your research task.

"Is it possible to use eye-tracking equipment to measure how concentrated or distracted somebody is while working on a computer?"

"What are the best methods for influencing peoples behaviour using a smart phone".

Encode this question in a number of keywords (English, use synonyms, etc).

2. Motivate which literature search engines are best suited and how this lead to a list of the items you selected ("search and selection criteria").
3. Read, describe, summarise, give an analysis of your findings.

Additional Knowledge Acquisition:

- What experts have you spoken about, and why?
- What knowledge did you want to collect, and did you succeed?
- Does the knowledge match the state of the art? Is there a list of urgent problems?
- Have you received feedback on your solution?
- What knowledge of KA did you use?

The assignment part: APPROACH

- Design a computational solution (“approach”) for your task. Describe the (sub)steps of your approach.
- We expect at least:
 - > a flowchart of your system
 - > a description of the chosen AI method to solve your problem
 - > a motivation for this
- Today: workgroups
- Next week: presentations
- Submit Friday 30 Sept

Feedback Assignment “Reserach Problem”

- Feedback in Canvas
- Questions?
